**SPECIAL SAFETY INSTRUCTIONS**

**CAUTION:** Use only Factory loaded ammunition. Do not use reloaded or hand-loaded ammunition.

- Always use only gun condition, undamaged, clean, dry, original high quality, commercially manufactured ammunition of a reputable company which is appropriate to the gun's caliber. Ammunition which is too small can fall forward and become a barrel obstruction Manufacturers design guns and ammunition within exacting engineering safety limits. Since handlebars are often outside those limits, they are not to be used.

**WARNING:** When a round is in the chamber, and regardless of the safety devices, this gun may discharge accidentally if it is dropped or receives a blow. Do not put a round in the chamber until the gun is in your hand and you are ready to shoot. Clear the gun immediately after shooting.

Use **ONLY COMMERCIALLY loaded cartridges** that have been loaded in accordance with SAAMI-C.I.P. standards.

**CAUTION:** NEVER TOTALLY RELY ON ANY SAFETY DEVICE. A safety device, like any mechanical device, could sometimes fail or it may worn or inadvertently manipulated into an unsafe condition.

**CAUTION:** When a round is in the chamber, and regardless of the safety devices, this gun may discharge accidentally if it is dropped or receives a blow. Do not put a round in the chamber until the gun is in your hand and you are ready to shoot. Clear the gun immediately after shooting.

**CAUTION:** Always keep your gun pointed in a safe direction, keep fingers off trigger and always keep hands and face away from muzzle and ejection port. Never point the gun at yourself or anyone else who is not present and cannot see your actions. Always keep the muzzle of your gun pointed in a safe direction when you are sure the gun is unloaded, never point the gun at anything you do not intend to shoot.

**CAUTION:** Always use extreme care with a misfire or failure to fire. Keep the gun pointed in a safe direction when you are sure the gun is unloaded, never point the gun at anything you do not intend to shoot.

**CAUTION:** Always wear protective shooting glasses to protect your eyes from injury by gun powder, gas, lubricant, dirt or metallic particles, carbon residue, sparks or other debris.

**CAUTION:** Keep gun in a safe direction.

**CAUTION:** Always use extreme care with a misfire or failure to fire. Keep the gun pointed in a safe direction and wait one full minute. This is because if hangfire or slow ignition has occurred, the round will still fire. If the round fails to fire after waiting, eject the round and examine the primer. Immediately refer to a competent gunsmith if you notice the firing pin indenter on the primer is light, off-center, or does not exist.

**CAUTION:** You can now point your gun at the intended target. Only when you are sure that you are pointing at your target and that nobody is anywhere near the target, behind it or anywhere next to you, you can cock your hammer to the full cock position. During this operation, make sure that you don’t touch the trigger in anyway. Only when you are absolutely certain that you are ready to shoot, you can pull the trigger.

**CAUTION:** You can now point your gun at the intended target. Only when you are sure that you are pointing at your target and that nobody is anywhere near the target, behind it or anywhere next to you, you can cock your hammer to the full cock position. During this operation, make sure that you don’t touch the trigger in anyway. Only when you are absolutely certain that you are ready to shoot, you can pull the trigger.

During this operation, make sure that you don’t touch the trigger in anyway. Only when you are absolutely certain that you are ready to shoot, you can pull the trigger.

**CAUTION:** You can now point your gun at the intended target. Only when you are sure that you are pointing at your target and that nobody is anywhere near the target, behind it or anywhere next to you, you can cock your hammer to the full cock position. During this operation, make sure that you don’t touch the trigger in anyway. Only when you are absolutely certain that you are ready to shoot, you can pull the trigger.

**CAUTION:** You can now point your gun at the intended target. Only when you are sure that you are pointing at your target and that nobody is anywhere near the target, behind it or anywhere next to you, you can cock your hammer to the full cock position. During this operation, make sure that you don’t touch the trigger in anyway. Only when you are absolutely certain that you are ready to shoot, you can pull the trigger.

To load the firearm:

1) Pull the hammer all the way back and then pull back the breech block rotating it to the rear (see photo N°1).

2) Always keep the muzzle of your gun pointed in a safe direction, even when you are sure the gun is not loaded. Never point the gun at something you are not going to shoot. To load the gun, point the barrel toward the ground at a 30° angle, after making sure the barrel is clear of any kind of obstruction and that the muzzle end does not touch the ground. Insert a cartridge into the chamber.

3) Make sure the cartridge is completely up against the extractor and rotate the breech block forward so it pushes the cartridge right into the chamber. (Photo N°2)

4) Always keep your gun pointed in a safe direction. Make sure the breech block is rotated fully closed. At this point, the gun is in the firing position. (see photo N°3).

5) Your gun has a “HALF COCK” safety device. NEVER TOTALLY RELY ON ANY SAFETY DEVICE. A safety device, like any mechanical device, could sometimes fail or it may worn or inadvertently manipulated into an unsafe condition.

**ALWAYS TREAT YOUR RIFLE AS IF IT IS LOADED AND READY TO FIRE.** The “HALF COCK” or “SAFETY” position is obtained as follows – pull the hammer back slightly just enough to take the tension on it. Pull the trigger and lower the hammer until it is about 1/10 of inch from the firing pin (see photo N°4). Then release the trigger and pull the hammer back slowly until you hear it click into the half cock notch. Gradually release the tension on the hammer ensuring that it is held securely in the half cock notch (see photo N°5). Try this operation with an unloaded gun until you are familiar with the movement.

**FIRING**

**CAUTION:** Make sure you have read and are thoroughly familiar with all safety instructions above before firing.

**CAUTION:** Always use extreme care with a misfire or failure to fire. Keep the gun pointed in a safe direction and wait one full minute. This is because if hangfire or slow ignition has occurred, the round will still fire. If the round fails to fire after waiting, eject the round and examine the primer. Immediately refer to a competent gunsmith if you notice the firing pin indenter on the primer is light, off-center, or does not exist.

**CAUTION:** You can now point your gun at the intended target. Only when you are sure that you are pointing at your target and that nobody is anywhere near the target, behind it or anywhere next to you, you can cock your hammer to the full cock position. During this operation, make sure that you don’t touch the trigger in anyway. Only when you are absolutely certain that you are ready to shoot, you can pull the trigger.

**UNLOADING**

**CAUTION:** Make sure you have read and are thoroughly familiar with all safety instructions above before unloading.

**CAUTION:** Always keep your gun pointed in a safe direction, keep fingers off trigger and always keep hands and face away from muzzle and ejection port.

To unload:

7) To remove a cartridge from your rifle, make sure you are keeping your muzzle pointing in a safe direction. Pull back the hammer into full cock, rotate the breech block backward. The cartridge will extract but not be fully ejected and you will have to remove it manually.

**CAUTION:** Keep gun in a safe direction, keep fingers off trigger and always keep hands and face away from muzzle and ejection port.

**STORAGE**

**CAUTION:** Always store your gun unloaded and separate from ammunition, each in its own locked receptacle beyond children’s reach and sight.
